USE OF NON-GAAP FINANCIAL INFORMATION

Symbotic reports its financial results in accordance with Generally Accepted Accounting Principles in the United States ("U.S. GAAP"). This press release contains financial measures that are not recognized under U.S. GAAP ("non-GAAP financial measures"), including adjusted EBITDA, adjusted gross profit and adjusted gross profit margin. These non-GAAP financial measures have limitations as an analytical tool as they do not have a standardized meaning prescribed by U.S. GAAP. The non-GAAP financial measures Symbotic uses may not be the same non-GAAP financial measures, and may not be calculated in the same manner, as that of other companies and, therefore, are unlikely to be comparable to similar measures presented by other companies. Rather, these non-GAAP financial measures are provided as a supplement to corresponding U.S. GAAP measures to provide additional information regarding the results of operations from management's perspective. Accordingly, non-GAAP financial measures should not be considered a substitute for, in isolation from, or superior to, the financial information prepared and presented in accordance with U.S. GAAP. All non-GAAP financial measures presented in this press release are reconciled to their closest reported U.S. GAAP financial measures. Symbotic recommends that investors review the reconciliation of these non-GAAP financial measures to the most directly comparable GAAP financial measures provided in the financial statement tables included below in this press release, and not rely on any single financial measure to evaluate its business.

Symbotic defines adjusted EBITDA, a non-GAAP financial measure, as GAAP net loss excluding the following items: interest income; income taxes; depreciation and amortization; stock-based compensation; CEO transition charges; joint venture formation fees; and other non-recurring items that may arise from time to time. Symbotic defines adjusted gross profit, a non-GAAP financial measure, as GAAP gross profit excluding the following items: depreciation and stock-based compensation. Symbotic defines adjusted gross profit margin, a non-GAAP financial measure, as adjusted gross profit divided by revenue. In addition to Symbotic's financial results determined in accordance with U.S. GAAP, Symbotic believes that adjusted EBITDA, adjusted gross profit and adjusted gross profit margin, non-GAAP financial measures, are useful in evaluating the performance of Symbotic's business because they highlight trends in its core business.

In addition to factors previously disclosed in Symbotic's Annual Report on Form 10-K filed with the SEC on December 11, 2023, and those identified elsewhere in this press release, the following factors, among others, could cause actual results to differ materially from forward-looking statements or historical performance: failure to realize the benefits expected from adding to our base of outsourcing partners; risks related to the GreenBox joint venture and the effects of pending and future legislation.

Any financial projections in this press release or discussed in the webcast are forward-looking statements that are based on assumptions that are inherently subject to significant uncertainties and contingencies, many of which are beyond Symbotic's control. While all projections are necessarily speculative, Symbotic believes that the preparation of prospective financial information involves increasingly higher levels of uncertainty the further out the projection extends from the date of preparation. The assumptions and estimates underlying the projected results are inherently uncertain and are subject to a wide variety of significant business, economic and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the projections. The inclusion of projections in this communication should not be regarded as an indication that Symbotic, or its representatives, considered or considers the projections to be a reliable prediction of future events.

Annualized, projected and estimated numbers are not forecasts and may not reflect actual results.

² Symbotic is not providing guidance for net loss, which is the most comparable GAAP financial measure to adjusted EBITDA, because information reconciling forward-looking adjusted EBITDA to net loss is unavailable to it without unreasonable effort. Symbotic is not able to provide reconciliations of adjusted EBITDA to GAAP financial measures because certain items required for such reconciliations are outside of Symbotic's control and/or cannot be reasonably predicted, such as the provision for stock-based compensation.
