

Symbotic Announces Agreement to Implement Multiple Industry-Leading Warehouse Automation Systems for Walmex and Strategic International Expansion in Mexico

October 10, 2024 at 7:00 AM EDT

WILMINGTON, Mass. and MEXICO CITY, Oct. 10, 2024 (GLOBE NEWSWIRE) -- [Symbotic Inc.](#) (Nasdaq: [SYM](#)), a leader in A.I.-enabled robotics technology for the supply chain, today announced it has entered into commercial agreements with Walmart de México y Centroamérica (MBV/BIVA: Walmex), to implement Symbotic's industry-leading warehouse automation systems in two of the retailer's locations near Mexico City.

Under the agreements, Symbotic will deploy its end-to-end systems at two greenfield distribution centers, with the first site currently breaking ground in the Bajío region of Mexico. The Bajío site will be one of the largest in Walmex's distribution network in Mexico and marks the largest system Symbotic has deployed as a single-phase project.

Symbotic established a new business entity, Symbotic Mexico, S. de R.L. de C.V., to serve customers in Mexico and tap into the growing global demand for warehouse automation. The new entity and first customer agreements in the region represent meaningful progress for Symbotic's strategic international expansion plans.

"We are pleased to welcome Walmex as a customer and to implementing state-of-the-art automation within its Mexican network that will enhance productivity in both its distribution centers and stores," said Rick Cohen, Chairman and Chief Executive Officer of Symbotic. "This marks a significant milestone in Symbotic's growth, demonstrating the broad applicability of our systems and our ability to provide revolutionary supply chain technology to a global market."

Symbotic's robotic case picking systems play a strategic role in supporting the retailer's goal of modernizing its vast supply chain network. The systems transform distribution centers for increased efficiency, capacity, and worker safety, enabling faster shipments to stores and increased inventory accuracy.

ABOUT SYMBOTIC

Symbotic is an automation technology leader reimagining the supply chain with its end-to-end, A.I.-powered robotic and software platform. Symbotic reinvents the warehouse as a strategic asset for the world's largest retail, wholesale, and food & beverage companies. Applying next-generation technology, high-density storage and machine learning to solve today's complex distribution challenges, Symbotic enables companies to move goods with unmatched speed, agility, accuracy and efficiency. As the backbone of commerce, Symbotic transforms the flow of goods and the economics of the supply chain for its customers. For more information, visit www.symbotic.com.
